

HOT WATER TESTER

Did you know that you pay for hot water twice? Once for the water itself and again to heat it. If your water is too hot, it could be dangerous, and you could be wasting money. Use this hot water tester to stay safe and **save money!**

Instructions

1. Run your hot water for 3 minutes. Then fill a cup and insert this card.
2. If the number is:
 - GREEN** That is the temperature of the water.
 - BLUE** The temperature is more than that number.
 - TAN** The temperature is less than that number.
 - RED 150+** The temperature is 150° F or greater.
3. If no change occurs the number is under 120° F.
4. 120° - 130° F is usually hot enough. If yours is hotter, turn down your water heater thermostat to save money and lessen the danger of scalding.
